

# S.L. Hardwoods Ltd

Why we use and recommend

## RhinoBond PU Adhesive

"As a Joinery or Cabinet manufacturer quality and costs are always critically important. Our Rhino Bond adhesive is easily applied, does not leave a noticeable glue line when sanded and polished, requires no mixing and joiners like to use it. Having been a manufacturer of quality softwood and hardwood joinery for over thirty years, I fully endorse and recommend Rhino Bond PU adhesive"

John H Smith - MD, SL Hardwoods

"I have been a Carpenter and Joiner for Twenty Five years and used P.V.A, One Shot (Powder Resin) and a variety of other adhesives. But in my opinion Rhino Bond PU is the best all round adhesive I have ever used"

Suresh Odedra - Leading Benchhand, SL Hardwoods

## Specification

Rhino Bond PU is a solvent free, moisture curing polyurethane adhesive.

- Quick curing time, yet still allows time for cramping
- Curing time can be improved by water misting
- Temperature resistant
- 100% water proof
